

PROFESSIONAL SUMMARY

Third-year Management Information Systems student with foundation in Business Analysis, including requirement elicitation, process modeling (BPMN 2.0), and BRD/SRS documentation. Experienced in conducting end-to-end analysis for academic and simulated enterprise projects, translating business needs into structured technical specifications. Seeking an IT Business Analyst Internship to contribute analytical thinking, stakeholder communication, and data-driven problem-solving skills in real-world projects.

EDUCATION

Banking Academy of Vietnam

Bachelor in Management Information Systems

Hanoi, Vietnam

Aug 2023 – Expected Jun 2027

- **GPA:** 3.3/4.0
- **Certificates:** TOEIC 725
- **Relevant Coursework:** Systems Analysis & Design, Database Management

SKILLS

BA Core Skills: BRD, SRS, Use Cases & Use Case Diagram, User Stories & AC, BPMN 2.0, UML (Activity, Sequence, ERD), UAT Testing Plan, API Testing (RESTful API), Wireframing/Mockups.

Tools: Draw.io, Jira / Confluence / Notion, Postman, Power BI, Visual Paradigm, Figma, SSMS.

Technical Knowledge: Python (Data Processing – Basic), SQL (Intermediate – JOIN, GROUP BY, Subqueries).

AI usage: Antigravity (Work Flow, Design), Claude (Generative - Mapping Documents), Stitch(Wireframe), ChatGPT Gemini).

Soft Skills: Stakeholder Communication, Requirement Elicitation, Analytical Thinking, Requirement Documentation, Team Work.

PROJECTS

Uni Wallet – EPAY Fintech | *Business Analyst*

Jan 2026 – Feb 2026

- Elicited and analyzed functional requirements across 2 core modules: KYC, Deposit/Withdrawal.
- Produced **BRD** and **SRS**, defining business rules, non-functional requirements, and 10+ lifecycle state models.
- Modeled **AS-IS** processes using **BPMN 2.0** across core wallet flows.
- Developed **Product Backlog** with 30+ **User Stories** and detailed **Acceptance Criteria**, ensuring end-to-end traceability from BRD to SRS.
- Designed **ERD** and **Sequence Diagrams** illustrating API orchestration across 4 system components: Mobile App, Backend, Wallet Core, and external integrations (Bank API, C06).
- Executed **UAT plan** covering 25+ test scenarios, validating transaction logic, OTP workflows, balance locking mechanisms, and edge-case handling.

Domino's Pizza Operations Analysis | *Team Lead*

Oct 2025 – Dec 2025

- Team size: 6.
- Led end-to-end process analysis for Domino's Pizza operations addressing 87% resource waiting time.
- Modeled **AS-IS** and **TO-BE** processes using **BPMN 2.0**, reducing 18 manual tasks to 11 automated workflows; simulation projected 76% cycle time reduction and 48% cost savings.
- Implemented **Odoo ERP**, migrating 6,448 invoices and 500+ customers, eliminating data silos across 5 departments.
- Designed and developed **2 Power BI dashboards**, defining key KPIs to identify high-risk customers and highlight over \$50K in revenue at risk.
